

Eclipse™ R.O.

Advanced Water Quality Monitoring Right at Your Tap

Effectively Used to Reduce:

- Nitrates
- Lead
- Arsenic (pentavalent)
- Cyst (cryptosporidium)
- Fluoride
- Radium 226/228
- and more*

ECLIPSE™ 

The Eclipse™ Reverse Osmosis Drinking Water System is designed to provide your family with the cleanest, healthiest water possible. Multiple filters clean ordinary household water to reduce unwanted and harmful contaminants.* System performance is verified with a touch monitor on the system's faucet base. Installation is simple — no electricity needed.

- Healthy, sparkling clear drinking water
- Pristine, flavorful coffee, tea and juice
- Clearer ice cubes
- Better tasting soups, sauces and meals when prepared with R.O. water
- Environmentally sound water treatment
- Cost effective — the daily cost of bottled water will no longer be a concern
- Convenient — fresh, clean water ready at your tap

WaterRight®
The Right Water
for Life

Eclipse™ R.O.

Advanced Water Quality Monitoring Right at Your Tap

Protect Your Drinking Water

The Eclipse™ reverse osmosis drinking water system offers a convenient, affordable, environmentally sound alternative to bottled water. This system is designed to filter water at the molecular level to reduce contaminants*; remove odors and improve the appearance and taste of your tap water. Your authorized Water-Right dealer can help you determine the best R.O. system for your household so you can enjoy the pure taste of bottled water, right at the tap.

Superior Features:

- TDS Faucet Monitor checks the operation of the system
- High flowing Thin Film Composite (TFC) membrane
- Dual sediment/carbon block pre-filter — longer life with superior filtration
- Disposable filters are clean and sanitary — no messy cartridges to handle
- Tested and certified by NSF International against NSF/ANSI Standard 58 for the reduction of the claims specified on the Performance Data Sheet
- Tested and certified for cyst reduction, including cryptosporidium
- Tested and certified for health related claims (see Performance Data Sheet)

Monitor Water Quality Right at the Tap

The water quality monitor is a standard feature of the ECLIPSE™ water dispenser. Just a push of the button gives you and your family the assurance of the highest quality water.

*The Eclipse™ WRO-35 R.O. Drinking Water System is Tested and Certified by NSF International against NSF/ANSI Standard 58 for the reduction of:

- lead
- arsenic (pentavalent)
- copper
- nitrates
- nitrites
- cyst (cryptosporidium)
- barium
- selenium
- cadmium
- fluoride
- TDS
- radium 226/228
- chromium (hexavalent)
- chromium (trivalent)

* See the Performance Data Sheet for specific percentages of contaminant reduction.
